

Best Choice Legal Technology Partner

Abacus Data Systems, Inc. enables the success of legal professionals and secures their future by providing Full-Service, Turn-Key, Legal Technology Solutions specifically designed for small, medium and large sized firms in any practice area and jurisdiction.

The Challenge

With over 30 years of service and more than 250,000 clients worldwide, we've seen firsthand the ever-changing challenges and opportunities that legal professionals face.

Most recently, per ABA Rule 1.1, Legal Technology is no longer an option, but a matter of professional competency.

We hear from legal professionals every day that the burden of finding, implementing and managing technology takes a bulk of their billable time, in addition to being stressful and confusing. Also, it takes much more than a simple software product to build and grow a successful Law Firm.

Increase Revenues • Reduce Costs
Maximize Efficiencies

The Abacus Solution

We recognize that every law firm does things a little differently. To this end, instead of offering cookie-cutter technology products and services, the Fully Integrated Abacus Products & Services Portfolio is a comprehensive suite of solutions that caters to specific firm needs and budgetary requirements.

The Abacus Portfolio is specifically designed to enable small, medium and large sized firms in all practice areas and jurisdictions to quickly scale up their practice, increase the number of cases they can handle and consistently deliver 'Best Possible Outcomes' for their clients.

Services range from technology readiness assessments to the design, deployment, implementation and management of In-Office or Virtual Office Law Practice Environments, to complementary back-office support, such as IT, Billing and Bookkeeping Services.
